

Steps to enable Password less authentication.

1. To register the Microsoft Authenticator app, follow these steps: If this already done. Please skip and proceed to next step

1. Browse to <https://aka.ms/mysecurityinfo>.
2. Sign in, then select **Add method > Authenticator app > Add** to add Microsoft Authenticator.
3. Follow the instructions to install and configure the Microsoft Authenticator app on your device.
4. Select **Done** to complete Microsoft Authenticator configuration.

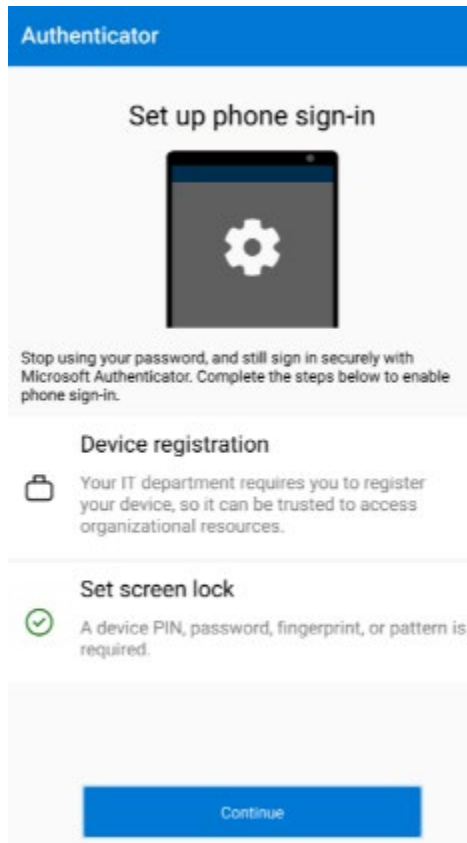

2. Enable phone sign-in

After users registered themselves for the Microsoft Authenticator app, they need to enable phone sign-in:

1. In **Microsoft Authenticator**, select the SMU AD account registered account listed in "Singapore Management University" in the Azure MFA app
2. Select **Enable phone sign-in**.

3. Follow the instructions in the app to finish registering the account for passwordless phone sign-in.
 1. The Azure MFA App will now prompt "Device registration" and "Set Screen Lock".

- 2.
3. Select "Continue", if there is a MFA prompt select "Approve"
4. Select "Skip" when ask to scan for QR code.
5. Select "Finish" in the "Account added" screen

6. Please verify via using <https://login.microsoftonline.com> and complete any verification screen prompted.
